Sanitary Circumstances of the Area.

1. (i) WATER:

The Council's Water Schemes, which now supply 19 parishes (as detailed later in this Section), have operated satisfactorily during the year.

Attention has been paid to action on lead, but it has not been found necessary to instal any form of treatment.

Chlorination:- All water is chlorinated. A Wallace and Tiernan Constant Flow Hypochlorinator is connected to the mains on both the Turkey Nab and Scugdale systems below the reservoir and above all connections.

These machines have been maintained and have operated satisfactorily during the year.

A scheme has been prepared to augment the supply. This scheme is to bring in supplies from additional springs at Clogger Hall, Ingleby; Merebeck, Faceby; Holiday House and Wether Hill, Scugdale.

Details of all supplies of water within the Council's area are herewith appended.
